on projects, getting help if needed.
Break
5 B **Art Show** Students will have their Final Project Prepared to Show.

This class is learning to work with water media. Chinese Ink is used and some water color. For this reason the student needs to provide support. Foam core board works well. Student cannot work directly on the table with their paper because the water and the ink will go through and ruin the table. Water color paper at least 90 lb is recommended for this class.
